

please don't let the phone company and cable companies take over the internet provider services as the sole source. they already charge more than a lot of people can afford and many people would lose their internet service for this reason. also in many small towns we have just recently been able to get local access that is affordable. the long distance charges on other services, because of our locations, are far more than most people can afford. the phone and cable companies will be taking more than their fair share of the market as they have in the past and it's time to let them know they don't own it all!!

thank you
